CONGRATULATIONS!

Congratulations for buying Polygon Bikes! A bicycle is a great tool for transportation and recreation. Hopefully, you can find enjoyment and have a great deal of use in every ride. This manual contains important information which includes safety, performance, and maintenance.

IMPORTANT

Read this manual before taking your first ride and use it for future reference as well.

Additional safety, performance, and service information related to specific components such as suspension, pedals, and other accessories, such as helmets or lights you have purchased. Make sure your nearest authorized dealer has given all the manufacturing literature which includes in your bicycle and accessories. In case of conflict between the instructions and information provided in this manual, always follow the component manufacturer's instructions.

If you have any questions or do not understand something within this guide, take responsibility for your safety and consult with your nearest authorized dealer or the bicycle's manufacturer.

NOTE

This manual is not intended for comprehensive use, service repair, or service manual. Please see your nearest authorized dealer for all service, repairs, and maintenance-related action. Your dealer is also able to refer you to classes, clinics, or books for service or maintenance.

WARNING

To ensure the warranty of your bicycle, be sure to only use the original spare parts.

SEATPOST CUTTING INSTRUCTION

NOTE

It is essential that Helios seatpost have a 45 degree chamfer cut on the rear trailing edge of the seatpost, without this chamfer may result in damage to the frame. If trimming is required after fitting, the following method is recommended

- Carefully measure before trimming the seatpost
- Use seatpost Cutting Guide sticker as your cutting guidance
- Seatpost Cutting Guide sticker should be attached from rear side of seatpost
- Use a blade designed specifically for cutting carbon composite materials or a fine tooth blade with greater than 32 teeth per inch
- Carefully proceed to cut the seatpost
- Carefully sand the end, use fine grit sandpaper to carefully remove an fraying or burring from the cut end.
- Applying carbon assembly compound before return to the frame.

WARNING

If trimming is required, final length should allow for a **minimum 60mm** of seatpost remaining in the frame. Failure to meet this requirement, may result in damage to the frame not covered by warranty policy, or serious injury to rider.

HELIOS A

SEATPOST CUTTING INSTRUCTION

RECOMMENDED SEATPOST LENGTH

SIZE	RIDER HEIGHT (CM)	SEATPOST LENGTH (MM)	DISTANCE FROM BOTTOM LINE (MM)	NOTE
XXXS	143-146	253	121.5	CUTTING IS REQUIRED
	147-149	274	100.5	
	150-153	290	84.5	
XXS	150-156	278	96.5	
	157-160	315	59.5	
XS	157-163	278	96.5	
	164-167	315	59.5	
S	164-174	305	69.5	
M	171-181	335	39.5	
L	178-188	354.5	20	
XL	185-195	354.5	20	NO CUTTING REQUIRED, AS THE 20MM SECTION IS DESIGNATED FOR THE BOTTOM CHAMFER

You will receive a seatpost cutting guide as shown in the image below as part of the Helios A purchase package. Please align the section marked with a red dot according to the recommended seatpost length provided, or alternatively, position it based on the distance from the bottom of the seatpost as indicated in the reference table. Carefully cut the Helios seatpost along the line marked on the seatpost cutting guide.

HELIOS A

SEATPOST CUTTING INSTRUCTION

EXAMPLE

Framesize (M)

Seatpost Length Recommended for Size M:
335mm

Cutting Distance Size M (X Length): 39.5
mm

Place the red dot exactly 335 mm vertically
downward from the center of the saddle
rail, or 39.5 mm horizontally upward from
the bottom section of the seatpost.

Ensure that the measurement matches the
recommended seatpost length before
proceeding and cut the seatpost carefully
along the indicated line.

For a clearer visual reference, please refer to
the image on the right.

HELIOS A

REGULAR INSPECTION

REGURAL INSPECTIONS BEFORE RIDING THE BICYCLE

Before riding the bicycle, check the following items. If any problems are found, consult your place of purchase or a distributor.

☐

Does the drive train perform gear shifting smoothly?

☐

Are the components securely installed to the frame/ handlebar/ stem, etc.?

☐

Is there sufficient charge remaining in the battery?

☐

Is there any looseness or damage in the component parts?

☐

Do any abnormal noises occur while riding?

AVOID

Avoid wearing clothing that may get caught in a chain or wheel, as this may cause an accident.

HELIOS A

HOW TO CLEAN THE BIKE

1

Use a bike wash or wet cloth to clean up every part of your bike. Preferably using a specific cleaner for the bike

2

Wipe the bike immediately until it's dry. Do not leave it in wet conditions for a long time.

3

Clean up the drivetrain with a clean and dry cloth.

4

Check and lubricate every component if needed, especially 2 or more components that rub against each other, such as the seat post, bottom bracket, hub, pivot frame suspension, ect

NOTE

- Use the right bike wash to make sure your every bike component and frame is safe.
- Avoid washing the bike using high - pressure water
- It is highly recommended to use specific lubricants for bicycle parts, not with engine vehicles or other oil since it might lead to component performance reduction
- It is recommended to use a bike cleaner rather than detergent, solvent like acetone, and thinner to clean the bike parts.

HELIOS A

HOW TO CLEAN THE BIKE'S CHAIN

1

Use a bike chain cleaner and gently brush it.

2

Wipe with a clean and dry cloth, and let it dry for minutes.

3

Lube the chain regularly
